## SMALL TO MEDIUM ENTERPRISES

**A TOWERING PRESENCE SINCE 1988**

### In Kuwait, the case of Small to Medium Enterprises is rather inconspicuous.

- ☑ Even though Kuwait is a high-income country, the contribution towards the GDP from Small to Medium Enterprises only amount to 3-5%
- ☑ The government employs 85% of the Kuwaiti workforce. This is an unsustainable working model.
- ☑ Dealing with government regulations eats up 14%-20% of a manager's time (results from the world bank study conducted in Kuwait)

## Small to Medium Enterprises in Kuwait, The Current Scenario

In thriving economies, Small to Medium Enterprises (Small to Medium Enterprises) are the lifeblood of the progression because of their contribution to the economy. In high-income nations, they amount up to 50% of the country's overall GDP.

An in-depth review of the scenario point towards licensing and permit hassles being the major reason for the slow development of Small to Medium Enterprises in Kuwait.

We understand the problems faced by Small to Medium Enterprises more than anyone does as Al Naqeeb and Partners law firm started out as a Small to Medium Enterprise. As a socially responsible company, Al Naqeeb and Partners law firm want to help your company reach heights it deserves.
